[PRODUCT DESCRIPTION]

AUDIO PRO G10 - Compact WiFi Wireless Multiroom Smart Speaker - Google Assistant - AirPlay 2 - Chromecast

Colours: Light Grey, Dark Grey

GOOGLE ASSISTANT AND AIRPLAY 2.

[FULL DESCRIPTION]

G10

Make use of the convenience of a voice controlled speaker. The G10 lets you manoeuvre your speaker without the use of your hands. With the built in Google Assistant you will also be able to ask your speaker questions or give instructions, like asking for a weather or traffic report, asking it to play specific music or call someone, play a game, keeping a to-do-list for you and reminding you thereof or simply to tell you a joke. There are over a million actions you can ask your speaker to perform.

With AirPlay 2 and Google Cast you have the option of creating a multiroom system with other AirPlay 2 and Google Cast compatible speakers, to let your favourite music flow from speakers in every room throughout your entire home. (The G10 cannot, however, be part of the Audio Pro app multiroom system.)

The G10 is a speaker with a modest footprint and rounded design, that makes a savvy addition to the smaller room. The fabric front perfectly complements modern interior design trends with the choice of two shades of grey, allowing a complete colour-match for your home.

The speaker has an astonishing sound, despite its compact size. The unconventional use of a dedicated woofer, and the BMR technique makes it possible to get both deep bass as well as clear details in your highs and midrange.

TOP 3 FEATURES:

Voice control via Google Assistant lets you manoeuvre your speaker without using your hands. And there are over a million other tasks and questions that the G10 can help you with.

AirPlay 2 and Google Cast lets you create a multiroom system with other AirPlay 2 and Google Cast compatible speakers.

Wall- and track- mountable speaker gives you free surfaces on your counters.
