Headphone Adapter

3.5mm to 4.4mm

Convert your headphones to fit 4.4mm Pentaconn balanced outputs

- Gold-plated 3.5mm headphone socket
- Leaf spring mechanism
- Convenient and robust right-angled design
- Gold-plated 4.4mm balanced headphone jack

Dimensions: 44x24x11mm (1.7"x0.9"x0.4")
Weight: 5.7g (0.2 oz)
Warranty period: 12months
 Specifications are subject to change without notice. S/N

Important: negative balanced signals are not connected to ground in the adapter, enabling a 3.5mm single-ended headphone connector to be converted for use with a balanced 4.4mm output without risk of damage to the amplifier. This adapter does not convert a single-ended connector into a balanced one - the connection remains single-ended.
