Constant impedance

Active Noise Cancellation²

ANC2 fighter jet stealth technology by AMR

Ground Zero design by iFi

The SupaQuasar is an endgame power cable for your audio setup. Featuring our Active Noise Cancellation 2 technology.

Actively eliminating noise across all frequency ranges across live, neutral and earth, the cable is truly geometrically balanced, a first in the world of power cables.

Using iFi audio's unique "Ground Zero" design technology, the cable creates a central core that is free of any magnetic fields.

No shielding to minimise capacitance, extremely low resistance to maximum current delivery, specifically designed for high power amplifiers.

The non-twisted central ground wire is surrounded by the live and neutral conductors as a geometrically-balanced pair double helix which protects the ground wire from any magnetic field. No induction voltage is created in the ground wire and therefore system ground noise is vastly reduced.

Each individual power line has concurrent shielding, so both internal and external RFI noises are minimised.

Low inductance, low capacitance and constant impedance are achieved for the entire cable by the use of the double circular helix power lines.

Constant impedance is achieved regardless of whether the cable is bent or angled, thanks to the fully symmetric and balanced geometric design.

The cable is insulated using a polymer matrix, which is comprised of a high-performing thermoplastic that is moisture-resistant and is RoHS compliant.

Continuing the true balanced theme, the cable uses air-dielectric delineation to give the best separation possible between the two balanced pairs of live & neutral conductors.

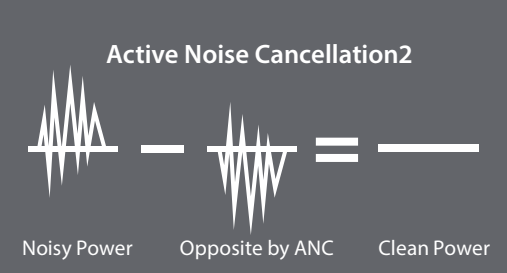

iFi audio uses the purest copper core to ensure excellent conductivity and our plugs are gold-plated with copper connectors to guarantee the best possible connection. Finally, the cable is finished in an impact resistant polymer casing for long-lasting durability.

ACTIVE POWER CABLE

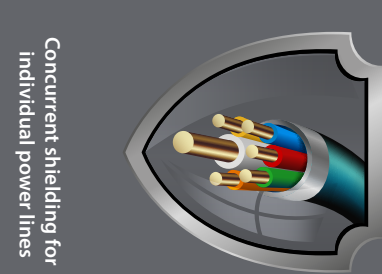

SPECIFICATIONS

Noise reduction:	> 40dB (> 100x)
Surge Protection:	max. 10,000A @ 775V / 8/20uS
Under operating voltage:	Maximum operating rating 15A at 125Vac and 10A at 250Vac
Cable Rating:	25A max
Socket Rating:	15A@125vac max
	10A@250vac max
Lengths:	1.8 m (70.8")
Net weights:	US: 1.20 kg (2.65 lbs)
	EU: 1.21 kg (2.67 lbs)
	UK: 1.22 kg (2.69 lbs)
	AU: 1.20 kg (2.65 lbs)
Limited Warranty:	12 months*

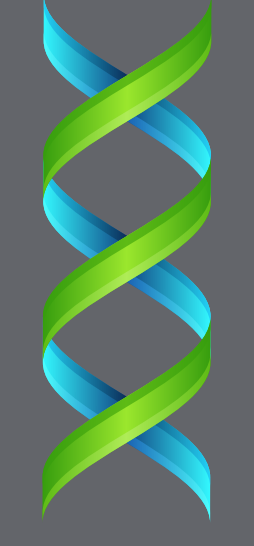

*12 months typical or as permitted required by local retailer laws.
*Specifications are subject to change without notice.

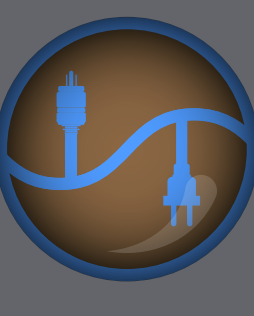

- Heavy OFHC continuous cast copper**
- Polymer casing** for lasting durability for excellent conductivity
- Concurrent shield for each power line** for minimization of internal and external RFI noise
- Polymer matrix** is unaffected by moisture, amorphous, dimensional accuracy, low dielectric constant
- Air-dielectric delineator**, best separation between balanced pairs of live and neutral
- Shotgun ground line non-twisting design** significantly reduce ground loop noises

Concurrent Shielding for External Power Lines

Double Circular Helix Power Lines

True Balanced Power Lines
