Height: 27 mm

Check your spindle height!
The spindle height with applied record shall not exceed 10,5mm!

Record Puck DS

This new record puck ensures a secure fit between record and turntable. With the two different finishes, black painted and polished aluminium, it perfectly fits the design of our turntables.

Record pucks use weight to secure a playing vinyl record against the turntable platter. By holding the two together, the sound performance of the turntable will improve, in timing and depth of sound.

With a weight of 915 grams, this puck is not recommended for smaller turntables as it could burden the turntable bearing.
